EDUCATION

DOKUZ EYLUL UNIVERSITY

BSc. in Computer Engineering

Izmir, Türkiye
September 2020 - June 2026

- Key Courses Taken:** Data Structures and Algorithms, Database Management Systems, Software Engineering, Computer Networks, Artificial Intelligence, Machine Learning, Computer Vision, Embedded Systems, and Computer Architecture.

EXPERIENCE

Software Development Intern

Bursa, Türkiye

İletişim Yazılım A.Ş.

June 2024 - September 2024

- Developed web applications using .NET Core MVC and Razor, improving user experience and system responsiveness.
- Integrated database-driven functionalities and optimized data access processes for better application performance.
- Collaborated in real-world software projects, gaining experience in backend development and agile workflows.

Network & IT Intern

Bursa, Türkiye

Akpınar Bilisim Hizmetleri

June 2025 - August 2025

- Designed and configured network infrastructures including VLANs, routing, and DHCP services using Cisco technologies.
- Deployed and managed virtualization environments, network devices, and enterprise IT components.
- Assisted in server room operations, cabling management, UPS integration, and infrastructure monitoring.

PROJECTS

Volleyball Performance Analysis System (Graduation Project)

- Developed a computer vision-based system using YOLO, pose estimation, and object tracking to analyze volleyball match videos automatically.
- Implemented player and ball detection, team classification, court filtering, and statistical performance metrics through a web-based dashboard.
- Built the platform using FastAPI, React, and SQLite, providing player-level and team-level analytics from raw match footage.

E-Commerce Market Website Development

- Developed an e-commerce web application using .NET Core MVC, Razor, and the Northwind database.
- Implemented dynamic pages, database-driven functionalities, and scalable backend components to support e-commerce operations.

Fraud Detection Using Machine Learning

- Built a fraud detection system using the IEEE-CIS Fraud Detection dataset with extensive data preprocessing and feature engineering.
- Trained and compared Random Forest and XGBoost models using cross-validation and ROC-AUC evaluation metrics.

Metropolitan Area Network Design

- Designed and simulated a Metropolitan Area Network (MAN) using Cisco Packet Tracer, connecting multiple devices and servers.
- Configured network communication, routing, and connectivity services to ensure reliable data exchange.

Autonomous Obstacle-Avoiding Car Development

- Developed an ESP32-based autonomous vehicle using ultrasonic sensors, LCD display, and buzzer modules.
- Implemented real-time obstacle detection and navigation logic for autonomous movement in dynamic environments.

TECHNICAL SKILLS

Languages: Java, C#, Python

Frameworks & Technologies: .NET Core MVC, FastAPI, React,

AI & Computer Vision: YOLO, XGBoost, Random Forest, Pose Estimation, Object Tracking

Databases: SQL Server, SQLite

Networking: VLAN, DHCP, Routing, Cisco Packet Tracer,

Tools: Git, GitHub, Visual Studio, VS Code, CVAT, Roboflow, Google Colab

LANGUAGES

Turkish (Native)

English (Upper-Intermediate)
